## Slips, Trips & Falls – make the Right decision!

<table>
<thead>
<tr>
<th>Look for Hazards</th>
<th>Consider the Risk</th>
<th>Decide what to do Safely</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image1" alt="Image of leaves on the ground" /></td>
<td><img src="image2" alt="Image of a sidewalk with a ramp" /></td>
<td><img src="image3" alt="Image of a person walking on slippery stairs" /></td>
</tr>
</tbody>
</table>

- Slips, trips and falls resulting in injuries such as **broken bones**, **bruising** and **musculoskeletal conditions**.

- If possible find an alternative route.
- If too slippery/icy do not proceed.
- Wear correct footwear
- Wear spikies in snow and ice.
- Do not read and walk
- Do not take shortcuts
- Do not rush
- Be safe on steps and stairs
- Be safe on slippery surfaces
- Be safe on inclines and ramps
- Be safe at the doorstep
- Good housekeeping
- Exit the vehicle with care

**Always follow the SSOW & report hazards to a Manager**
