

Updated Driving Behaviours...

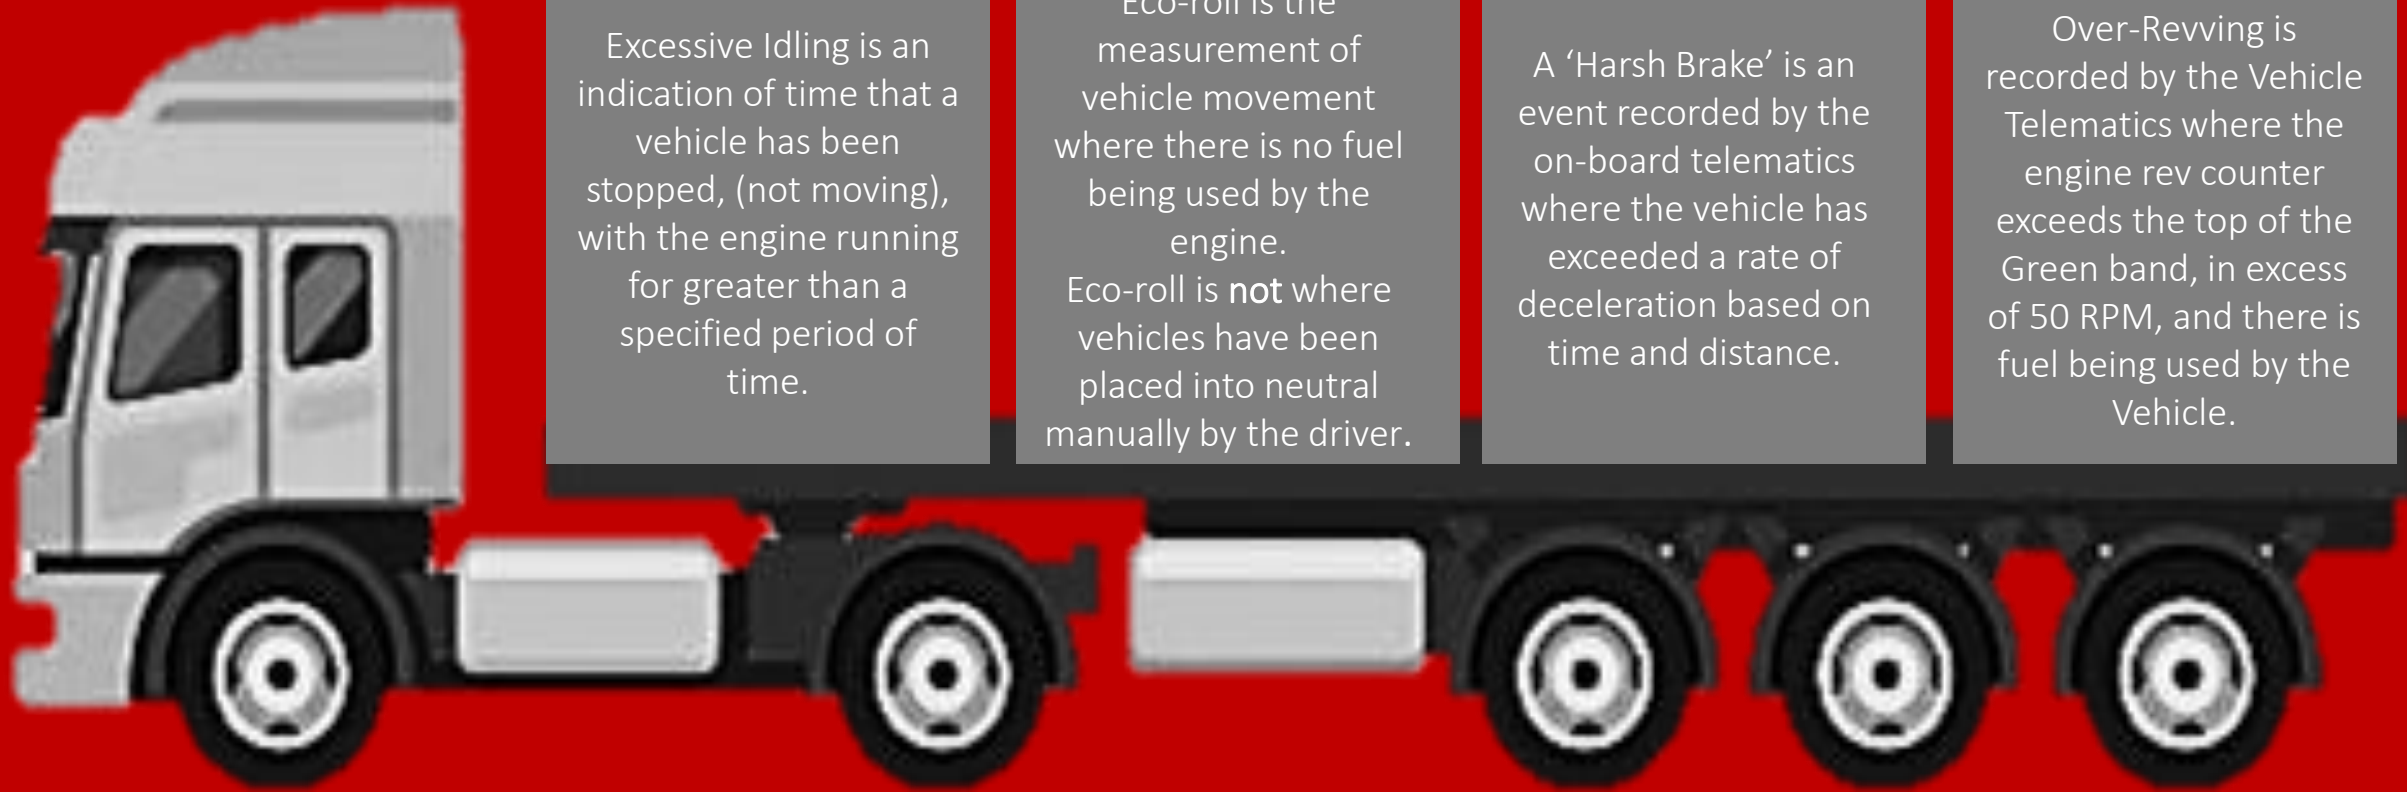

Royal Mail

From XXXX, Royal Mail along with the CWU will be updating the monitored driving behaviours on Isotrak.

Please ask your Manager or ADC for more information on improving your driving style.

Idling

Excessive Idling is an indication of time that a vehicle has been stopped, (not moving), with the engine running for greater than a specified period of time.

Eco-roll

Eco-roll is the measurement of vehicle movement where there is no fuel being used by the engine. Eco-roll is **not** where vehicles have been placed into neutral manually by the driver.

Harsh braking

A 'Harsh Brake' is an event recorded by the on-board telematics where the vehicle has exceeded a rate of deceleration based on time and distance.

Over-revving

Over-Revving is recorded by the Vehicle Telematics where the engine rev counter exceeds the top of the Green band, in excess of 50 RPM, and there is fuel being used by the Vehicle.
