

Safety, Health and Environment (SHE) Huddle

Huddle Date:	w/c 26 th August 2020	Ref:	FY20 005 Staying Hydrated			
Audience:	Processing	Delivery	Collections	Distribution	PFW	Specific Work Area
	Outdoor workers					
Overview:	Staying hydrated – refillable water bottles.					

It is important to stay hydrated whilst at work. Refillable Water Bottles are now being made available prioritised for outdoor workers. Some of you already bring in your own water bottles to drink throughout the day whilst on duty but we do now have a limited stock of empty one litre bottles that we can order from uniform stores if someone needs one. Due to coronavirus we want to remind people about how to safely fill empty water bottles.

DO NOT allow the neck of your bottle to touch the drinking water tap/nozzle of the water dispenser.

DO use a sanitising wipe to wipe the drinking water tap/dispenser nozzle if there is any contact with the bottle.

DO dispose of wipes in the designated bin.

Sanitising wipes will be available next to the water dispensers and drinking water taps.

To see where you can fill up whilst out on delivery, visit Refill.org. Now more businesses are open please take time to check available toilet stops on your route.

Please note that water fountains like those below remain OUT OF USE.

Stay Sun Safe while at work, display the [Sun Safe poster](#) in your unit.
